## Air Spray Gun

**“fit & feel”**

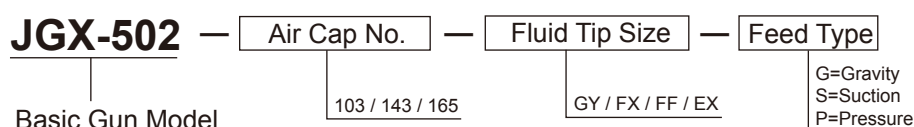

Lightweight, Compactness  
and High Performance

The JGX-502 air spray gun, an improved version of the JGX-501, is a product of the latest finishing technology developed in Japan, in cooperation with DEVILBISS in USA, a pioneer and current leader in the finishing industry for more than 120 years.

The JGX-502 air cap is retained onto the spray gun by a retaining ring that screws to threads on the baffle. The retaining ring is made from lightweight and very durable POM. This feature provides a longer gun life cycle and in the event of thread damage, only the replacement of the baffle is required.
